CLOSEST TO A WIN (NONE IS A CLEAR YES)

## Multi-Peptide Body Oil (NØRD BODY) Backlog

No clear yes yet, but the peptide body oil is the best lead: one brand has advertised it alone for four months, it is white-label so you can source it, and Germany shows no copies so far.

### HOW TO READ THIS

**Demand**
Are more people searching for it than a year ago (last 2 years only), and is Amazon selling units? Green = rising.

**Same product in shops**
A PHOTO search in each country, then a check of what a shopper finds by typing the product words. Red = in a big chain. Amber = a cheaper copy shoppers will find or trust. Light green = copies exist but are hidden or about the same price. Green = nobody else.

**Amazon**
Are there listings with thousands of reviews? Green = not yet.

**Advertisers**
How many brands run Facebook ads for it today, and when did they start? One brand for months = proof. Dozens in the last few weeks = a swarm.

**Cost to buy**
What a supplier such as AliExpress charges for it, and what that leaves you per sale. Green = 70% or more left.

Verdicts: Test now worth a small paid test now Backlog interesting, but only with a twist Avoid don't. Scores are out of 100.

**Checked on 2026-10-11.** Markets move fast, so check again before you spend money. Keep in mind: Product costs are estimates: supplier prices are starting prices before shipping; Ad counts only include ads that use the exact product words, so real numbers can be higher; Green on a map means we found nobody else selling this exact item there, not that nobody does; Lash adhesive is a cosmetic used near the eye: selling in the EU or UK needs a safety assessment and product registration.

Red = in a big chain. Amber = a cheaper copy that shoppers will find or trust. Light green = copies exist but are hidden, weak or about the same price. Green = nobody else found. Grey = not checked.

**Best region:** Germany: no copy found by photo or in the top shopper results, and the proof (four months of ads) comes from Australia.

**Proof the price gap is survivable:** NØRD BODY has kept ads running for 4 months at A$55 while copies sell for less than half that in 4 of 5 countries. Shoppers are paying the gap, so a cheaper copy existing has not stopped this product selling.

PICTURE CHECK **IDENTICAL** **The same amber pump bottle and box, sold without the brand name on AliExpress and by many sellers on Amazon.**

Multi-Peptide Body Oil (NØRD BODY)

Unbranded on AliExpress

## WHY BACKLOG

- NØRD BODY runs 199 of the 202 ads for "peptide body oil", live since 8 June, about 50 new ads a month
- It is a white-label oil: the same bottle and box are on AliExpress without the brand, so you can source it
- Germany is clear so far; the UK has it at £11.99 (Amazon result 1) and the US at US$27.80

## BIGGEST RISK

A white-label product can be copied by anyone overnight, and EU cosmetics rules apply before the first sale.

## WHAT TO DO NEXT

- Ask the AliExpress supplier whether the oil comes with EU cosmetic safety paperwork (a CPSR) and registration
- If yes, test in Germany with German ads: 3 short massage videos, about €20 a day for 5 days

Each brand is counted once, in the month its oldest still-running ad began. Facebook only shows ads that are still running and brands replace them often, so a brand can be far older than its bar. The shop ages in the table below are the better guide to who is new.

What it costs to buy. The shops map shows who you would compete with; this page shows whether you can get the product, and what is left after you pay for it.

## The photo search did not turn up a supplier listing for this exact object. That does not prove there isn't one: search AliExpress for it by name or picture before you decide.

No supplier listing turned up for this exact object in the photo search. Most products sold this way do have one, so look before you decide: search AliExpress by name, or use its search-by-picture with the brand's photo. If you truly cannot find it, it may be custom-made, and a sourcing agent is the next step.

**Search AliExpress for it →**

### BEFORE YOU ORDER, ASK THE SUPPLIER

- What is the total cost delivered to my customer's country, per unit?
- How many days from order to the customer's door?
- Can you send one sample first, and do you have the safety paperwork this product needs?

DermoCosmetic · €24.99 (shown as reduced from €39)

Backlog

**63**/100 · Medium confidence

**One Italian shop has advertised this alone for six months, which is strong proof. But it copies Tarte's best-seller, which Sephora and Ulta sell, and look-alikes cost £6 on Amazon UK.**

ADVERTISERS
**1 brands**
One brand owns it. 1 brands, but dermocosmetic.it runs 61 of the 61 ads.

COST TO BUY
**Not found yet**
The photo search found no supplier listing. Search AliExpress for it before you decide.

| COUNTRY | | WHAT WE FOUND | BRAND VS CHEAPEST COPY |
|---|---|---|---|
| **New Zealand** | Light green | 3 copies, all hard to find. Cheapest: Amazon (not in the top results, 0 reviews) | |
| **Australia** | Amber | Temu: on Temu or Shein. 9 other copies | A$44 vs A$9 |
| **United Kingdom** | Amber | Amazon.co.uk - Amazon.co.uk-Seller at £5.99: Google Shopping result 3 for the product words. 10 other copies | £22 vs £6 |
| **United States** | Red | The same object is sold by Ulta Beauty at $32 | US$29 vs US$8 |
| **Canada** | Red | The same object is sold by Walmart at CA$18 | C$40 vs C$15 |

Red = in a big chain. Amber = a cheaper copy that shoppers will find or trust. Light green = copies exist but are hidden, weak or about the same price. Green = nobody else found. Grey = not checked.

**Best region:** None of the six. The proof is in Italy, which these checks do not cover; Spain or Portugal would copy that playbook.

**Proof the price gap is survivable:** DermoCosmetic has kept ads running for 6 months at €24.99 while copies sell for less than half that in 4 of 5 countries. Shoppers are paying the gap, so a cheaper copy existing has not stopped this product selling.

PICTURE CHECK **IDENTICAL** **The same rose-gold square compact with a mirror: Tarte's original, and many look-alikes.**

Under-Eye CC Cream Compact (DermoCosmetic)

Tarte at Sephora (US$32)

## WHY BACKLOG

- DermoCosmetic runs all 61 Italian ads for "correttore occhiaie" and its oldest has run since 30 March
- It is a look-alike of Tarte's Colored Clay CC Undereye Corrector, sold by Sephora, Ulta, Kohl's and Macy's at US$32
- Look-alikes are easy to find: £5.99 on Amazon UK and on Temu in Australia

## BIGGEST RISK

Copying a famous brand's look invites ad takedowns, and EU cosmetics need a safety report and registration before the first sale.

## WHAT TO DO NEXT

- Get a quote for an EU cosmetic safety report and registration from a Responsible Person service
- If it is affordable, test a market DermoCosmetic is not in (Spain or Portugal) with your own branding

- TAKEN: "Does not crease, even after 8 hours" for mature skin (DermoCosmetic's main message)

Magnetic Tennis Swing Trainer (SwngPro)

Walmart Canada (CA$23)

## WHY BACKLOG

- Swng runs 60+ ads and is ramping fast (36 started in October), with almost no other advertisers
- A supplier sells it from about US$8, so roughly 90% of the US$89 price is left for ads and profit
- But copies are easy to find: Amazon US result 3 at US$29.99, UK result 2 at £17, Germany result 1 at €45.99

## BIGGEST RISK

Swng's ads are only six weeks old, so they are not yet proof it pays, and Amazon copies undercut US$89 by two thirds.

## WHAT TO DO NEXT

- Check again in early December: if Swng's late-August ads are still running, the ads pay
- Then test it for padel or pickleball players, which Swng ignores: 3 short ads, about €20 a day for 5 days

Each brand is counted once, in the month its oldest still-running ad began. Facebook only shows ads that are still running and brands replace them often, so a brand can be far older than its bar. The shop ages in the table below are the better guide to who is new.

What it costs to buy. The shops map shows who you would compete with; this page shows whether you can get the product, and what is left after you pay for it.

## DHgate sells it for about US$8 before shipping. At the brand's price of about US$89 that leaves about US$81 a sale (91%) to cover ads, payment fees and profit.

| SUPPLIER PRICE | THE BRAND SELLS IT FOR | LEFT PER SALE | MARGIN |
|---|---|---|---|
| about US$8 | about US$89 | about US$81 | 91% |

How to read it: **left per sale** is the most you could spend on ads to win one sale before you lose money. Payment fees, returns, shipping and your profit all have to come out of it too, so a healthy test needs ads to cost well under that.

### SUPPLIER LISTINGS FOR THE SAME OBJECT

|---|---|---|---|---|
|  | **DHgate** | small orders | EUR 6.92<br>Starting price shown on the listing; shipping not included | BadmintonSwingTrainer PowerGenerator... From 6,92 € \| DHgate |

Supplier prices change daily and are often sale prices. AliExpress and CJ Dropshipping sell one at a time, which is what a dropshipper needs. Alibaba and Made-in-China quote prices for bulk orders.

**Search AliExpress for it →**

### BEFORE YOU ORDER, ASK THE SUPPLIER

- What is the total cost delivered to my customer's country, per unit?
- How many days from order to the customer's door?
- Can you send one sample first, and do you have the safety paperwork this product needs?

Men's Hair Removal Cream (Botane Man)

AliExpress (about A$8)

## WHY AVOID

- Shoppers typing the product words see Veet, Nair, Nad's and No Hair Crew from about US$5 to US$25
- At least 109 brands advertise "hair removal cream", 54 of them for 3+ months
- The exact bottle, with the same Botane Man name, is on AliExpress for about US$5 and on Temu in 3 countries

## BIGGEST RISK

Depilatory creams can burn skin, and "safe for intimate areas" claims invite complaints, refunds and ad rejections.

## WHAT TO DO NEXT

- Skip it. The margin is large, but big brands own the shelf and the same bottle is on Temu

| Swarm gate | Pass | Crowded rather than a swarm: half the 109 brands have advertised for months |
| Bulk gate | Pass | Small and light |
| Regulated gate | Flag | A depilatory cosmetic: EU safety report and registration needed, and burn risk on intimate skin |

Crowded

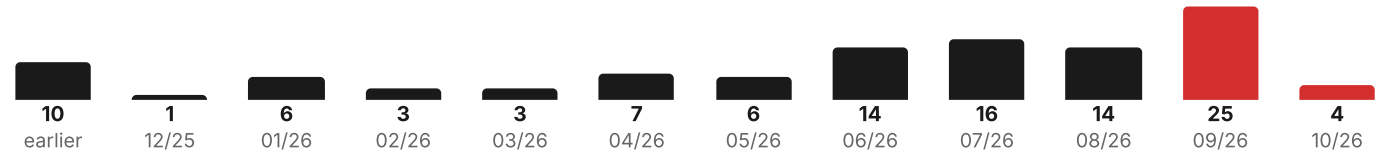

**The phrase is crowded: 109+ brands, 54 of them advertising for 3+ months, including men's specialists No Hair Crew and Männlich. Botane's own ads, run through a coach's page, only started on 8 September.**

## OLDEST AD STILL RUNNING, BRAND BY BRAND (MONTH/YEAR)

**A sample, not the whole market:** the first 250 live ads. Facebook has more, so every number here is a minimum.

Each brand is counted once, in the month its oldest still-running ad began. Facebook only shows ads that are still running and brands replace them often, so a brand can be far older than its bar. The shop ages in the table below are the better guide to who is new.

What it costs to buy. The shops map shows who you would compete with; this page shows whether you can get the product, and what is left after you pay for it.

**AliExpress sells it for about US$5 before shipping. At the brand's price of about US$65 that leaves about US$60 a sale (92%) to cover ads, payment fees and profit.**

| SUPPLIER PRICE | THE BRAND SELLS IT FOR | LEFT PER SALE | MARGIN |
|---|---|---|---|
| about US$5 | about US$65 | about US$60 | 92% |

How to read it: **left per sale** is the most you could spend on ads to win one sale before you lose money. Payment fees, returns, shipping and your profit all have to come out of it too, so a healthy test needs ads to cost well under that.

## SUPPLIER LISTINGS FOR THE SAME OBJECT

| | Supplier | Sells in | Price | Listing |
|---|---|---|---|---|
|  | **AliExpress** | single orders | AUD 8.00<br>Price shown in the picture search; shipping not included | Botane Man Gentle Hair Removal Mousse Aloe Vera Painless ... |

Supplier prices change daily and are often sale prices. AliExpress and CJ Dropshipping sell one at a time, which is what a dropshipper needs. Alibaba and Made-in-China quote prices for bulk orders.

**Search AliExpress for it →**

## BEFORE YOU ORDER, ASK THE SUPPLIER

- What is the total cost delivered to my customer's country, per unit?
- How many days from order to the customer's door?
- Can you send one sample first, and do you have the safety paperwork this product needs?

Neck Firming Cream (Mudganics)

Skin Physics neck cream at Priceline (A$80), a different brand

## WHY AVOID

- 40 brands advertise "neck firming cream" and 38 of them started in the last two months: a swarm
- Amazon is enormous: 431,550+ bought last month in the US, top listings with 19,000-37,900 reviews
- You cannot buy this formula: you would need your own private-label cream against StriVectin, Olay and dozens of Amazon brands

## BIGGEST RISK

Firming and anti-ageing claims on a cosmetic need evidence and safety paperwork, and Meta reviews before-and-after ads strictly.

## WHAT TO DO NEXT

- Skip it. Demand is real, but sellers are flooding in faster than it grows

## OLDEST AD STILL RUNNING, BRAND BY BRAND (MONTH/YEAR)

Each brand is counted once, in the month its oldest still-running ad began. Facebook only shows ads that are still running and brands replace them often, so a brand can be far older than its bar. The shop ages in the table below are the better guide to who is new.

### The photo search did not turn up a supplier listing for this exact object. That does not prove there isn't one: search AliExpress for it by name or picture before you decide.

No supplier listing turned up for this exact object in the photo search. Most products sold this way do have one, so look before you decide: search AliExpress by name, or use its search-by-picture with the brand's photo. If you truly cannot find it, it may be custom-made, and a sourcing agent is the next step.

#### BEFORE YOU ORDER, ASK THE SUPPLIER

- What is the total cost delivered to my customer's country, per unit?
- How many days from order to the customer's door?
- Can you send one sample first, and do you have the safety paperwork this product needs?
